**SPRAY**

A Pain Relieving Medicine in Moisturizing and Fast-absorbing Oils

FOR EXTERNAL USE ONLY

Manufactured in USA by:

**KYDES**

60 mL

**Apply Pain Medicine Right Where it Hurts for Quick and Sustained Relief**

## What is DYKLO Spray Topical Solution?

DYKLO Spray is a mentholated solution containing a non-steroidal anti-inflammatory drug (NSAID), **diclofenac**, in its most absorbable form and a local anesthetic agent, **lidocaine** in a blend of moisturizing and fast-absorbing oils. With its three well-known active ingredients in a novel, technologically advanced delivery system, DYKLO Spray is a fast acting spray that quickly numbs the area to help reduce the pain and also controls the pain for longer periods. **Because it's a topical medicine, you apply it right at the site of pain.**

## When Can I Use it?

A more convenient and effective as well as longer-acting alternative to ice packs, massage oils and other topical pain products. Ideal for use in injuries sustained during sports and artisan activities.

Especially good for body-wide pain and tenderness in the joints, muscles, tendons, and other soft tissues:

- Pain and inflammation in the neck, shoulders, back, knees, leg, feet
- Sciatica
- Lumbago
- Fibrositis
- Strains & Sprains
- Cramp
- Bruises
- Cyclical and non-cyclical breast pain
- Leg pain
- Surgical (incisional) site pain

## What makes DYKLO Spray unique?

DYKLO Spray Topical Solution 5% has the following characteristics:

- Diclofenac free acid has the greatest skin permeability of all NSAIDs than their salts but formulation has been a problem until now.
- DYKLO Spray contains diclofenac as the free acid or simple ester at the highest concentration compared with other topical diclofenac products without limiting penetration through the skin as observed for other topical products.
- The only diclofenac combination product with Lidocaine, a well-known local anesthetic agent.
- Higher concentration gradient potentially results in greater penetration into targeted tissues than other topical gels or creams.

- Topical products are designed to attain higher drug concentration at the site of pain than oral diclofenac with minimal systemic side effects.
- Does not dry or irritate the skin.
- Convenience for patients - compact 60ml bottle, easy to carry, easy to use and non-greasy.
- Preservative-free

### Where Can I get it?

DYKLO Spray is available in most Pharmacies and Chemical Shops in Ghana. For bulk purchase contact: KYDES Pharmaceuticals Ltd., Tel: 030 2219564 or (1) 410 499 7379 (USA).

### IMPORTANT SAFETY INFORMATION for DYKLO Spray and other diclofenac (NSAID) products

DYKLO Spray and other topical NSAIDs and local anesthetics are generally well-tolerated in clinical trials with a low incidence of adverse events. **However, all NSAIDs, including DYKLO Spray, have serious risks.**

NSAID medicines should only be used:

- at the lowest dose possible for your treatment for the shortest time needed
- Do not use DYKLO Spray if you are allergic to diclofenac (the active ingredient in DYKLO Spray) or if you have had asthma, hives, or other allergic-type reactions after taking aspirin or other NSAIDs.

Tell your healthcare provider:

- if you have a history of ulcers or bleeding in the stomach or intestines, or kidney or liver problems, or heart failure
- about all of your medical conditions
- about all of the medicines you take. NSAIDs and some other medicines can interact with each other and cause serious side effects
- if you are pregnant or breastfeeding. DYKLO Spray should not be used late in pregnancy

Possible side effects include allergic reactions. **Get emergency help right away if you have any of the following symptoms:** shortness of breath or trouble breathing, chest pain, weakness in one side of your body, slurred speech, or swelling of the face or throat. **Stop using DYKLO Spray and call your healthcare**

**provider right away if you have:** skin rash or fever with blisters.

Do not use DYKLO Spray on the same area treated with other topical products, such as sunscreens or insect repellents. You should not use DYKLO Spray with oral NSAIDs.

Use DYKLO Spray exactly as prescribed by your healthcare provider.

- Apply DYKLO Spray to clean, dry skin that does not have any cuts, infections, or rashes
- Avoid exposing skin where you apply DYKLO Spray to sunlight and artificial light, such as tanning booths
- Do not get DYKLO Spray in your eyes, nose, and mouth

You are encouraged to report negative side effects of any drug to the Ghana Food & Drugs Board. Visit [www.fda.gov.gh](http://www.fda.gov.gh). Comments or Questions? Call toll-free: 030 221 9564
